1325 NE 58th Ave. | Portland, OR 97213

Summary

Full Stack Web Developer with a zest for problem-solving, building complex architecture in various programming languages, and mathematics/logic. Affinity for ReactJS, NodeJS, navigating via the terminal, and adhering to proper Git flow practices.

Projects

ShowMyShow App | www.showmyshow.org
ShowMyShow is an application that allows fans and bands to connect with one another. Users (fans or bands) can sign up using a valid email address and connect to a one-stop shop that allows them to discover tons of information on upcoming music events in a given city. Fans can search for concerts in a specific city and are returned a list of upcoming shows with specific information and links to tickets via Ticketmaster - fans can also save shows to their profile and come back to them at a later date. There is a messaging function - the "Green Room" - where fans can connect with other fans to talk about music. Additionally, upon login, fans and bands alike are provided with a scrape of Tweets from the hashtag #ShowMyShow directly on their login page so they can keep current with any immediate information shared via Twitter.

Everyday Recipes App | my-favorite-recipes-app-portla.herokuapp.com
Cooking can be an incredible experience but it can also be incredibly frustrating. Surfing through old cookbooks with sustained, hard to read recipe cards can take all the joy out of the kitchen. Everyday Recipes provides a one-stop location for users to enter their favorite recipes to be stored in a personal database so that their recipes are easily retrievable, no matter the digital environment.

Interactive Entertainment Planner App | samrogers15.github.io/Interactive_Entertainment_Planner
Motivated by the monotony of quarantine life, this application allows a user to plan out an evening of fun based on a few simple inputs. Provide a few of your favorite ingredients and a movie you like and the Interactive Entertainment Planner will provide you recipe suggestions based on those ingredients, similar movie suggestions based on the movie you input, and will allow you to generate a randomly selected recipe for a cocktail. Sit back and relax!

Experience

Wieden + Kennedy, Portland, OR | Media Supervisor, Old Spice Team — February 2020 - Present
